POLICY FOR PHYSICAL FACILITIES - SHARING AND MAINTENANCE

The college infrastructure is a backbone of the education which proves strong support to different activities that are going to conduct in it. Due to this pivotal role of the infrastructure, the college is committed to create new infrastructure wherever it is possible. At the same time whenever it is necessary to enhance, to renovate and to maintain the infrastructure, the college attempts to complete it.

To ensure optimum utilization of the resources, the college infrastructure, including labs has to be used for academic and research activities by the faculty and students thereby contributing in the nation building effort.

1. Common facilities like ground, auditorium, conference halls, seminar halls, and multipurpose indoor facilities etc. may be provided for the conduct of academic events byother institutions, organizations after due evaluation of their prior request.
2. The college has a basketball cum volleyball court, , indoor table-tennis cum fitness center (gymnasium) for the use of staff, students for maintaining their physical fitness and training for competitive events.
3. The college may serve as venue for the conduct of local and national level examinations such as UPSC, MPSC, ICAI, SET, railways, bank recruitment drives, state government directorates etc.
4. The college to also serve as an Examination center for the Annual and End-semester Examinations of the affiliated University. At the same time SSC and HSC examinations are conducted every year in the college building on the basis of co-operation
5. To ensure proper maintenance of the college infrastructure, the services of electricians, mechanics, plumbers and gardeners are to be made available in the college campus compulsorily during the office hours and quick response in case of emergencies during odd hours.
6. Few of the college non-teaching staff members are identified and trained to provide suchprofessional services in addition to their routine work.

7. Since the line voltage fluctuations and power failures is likely to cause greater harm, proper care is taken for the safeguard and steady functioning of IT infrastructure, sensitive and expensive equipment by providing with necessary back up and support systems.
8. For the maintenance of advanced or expensive hardware, the services of reputed and reliable vendors subscribed by signing an Annual Maintenance Contract (AMC).
9. The funds obtained from the state/central government bodies, UGC, and the college management for the upgradation, maintenance and upkeep of infrastructure and support facilities are to be utilized for the same purpose only. Enough care to be taken that these funds are utilized during their allotted time frame.
10. Program Implementation Group (PIG) of a few faculty members is constituted for the supervision and monitoring of fund utilization received from various sources within their stipulated time frame.
11. The college is committed to share its infrastructural facilities for events such as blood donation camp, relief and e-waste collection centers etc. which are exclusively for the betterment of the society
